

CURRENCY MANAGEMENT

CONDUCT BUSINESS GLOBALLY USING ADVANCED FEATURES TO SUPPORT INTERNATIONAL SUBSIDIARIES, VENDORS, AND CUSTOMERS

Save time managing international subsidiaries and operations. Currency Management automatically computes realized and unrealized gains and losses, performs account revaluations, and translates financial statements. Operations in multiple currencies become available through all Acumatica financial modules.

KEY FEATURES OF CURRENCY MANAGEMENT

- **Realized gains and losses calculations.** Automatically calculate realized gains and losses from foreign currency transactions entered into any financial module. This can include receiving payments from customers, issuing payments to vendors, and transferring funds between accounts.
- **Unrealized gains and losses adjustments.** Create adjusting entries for unrealized currency exchange gains and losses. Automatically prepare auto-reversing entries in General Ledger for all open documents recorded in foreign currencies.
- **Financial statement translation.** Manage subsidiaries that operate in a foreign currency—or prepare your financial statements in a foreign currency. Translation of the trial balance follows FASB-52 standards. Automatically calculate translation gains and losses. Automate the consolidation of financial statements from multiple subsidiaries in combination with the General Ledger module.

From Currency	Currency Rate Type	Currency Effective Date	Currency Rate	Multiplier	Rate Reciprocal
EUR	APFADE	7/29/2008	1.72790000	Multiply	0.57903900
EUR	ARTADE	7/29/2008	1.41300000	Multiply	0.70771400
EUR	BANK	7/29/2008	1.72790000	Multiply	0.57903900
EUR	HIST	7/1/2005	1.57700000	Multiply	0.63411500
EUR	SPOT	7/29/2008	1.57000000	Multiply	0.63694300
GBP	APFADE	7/29/2008	2.18900000	Multiply	0.45683800
GBP	ARTADE	7/29/2008	1.78100000	Multiply	0.56234700

Use different rate types for different accounts during the translation process. The currency rate table is kept in Acumatica. You can configure as many currencies as you want.

KEY BENEFITS

WORK FROM ANYWHERE

- Access all your currency management features from anywhere using any popular web browser

MANAGE INTERNATIONAL CUSTOMERS AND VENDORS

- Maintain balances in a local currency and the base currency for each vendor and customer
- Calculate realized and unrealized gains and losses automatically

STREAMLINE YOUR BOOK CLOSING PROCESS

- Automatically revalue general ledger accounts
- Create auto-reversing entries for unrealized gains
- Compute realized gains and losses

REDUCE THE IMPACT OF CURRENCY FLUCTUATIONS

- Monitor potential fluctuations through drill-down reports and dashboards

CURRENCY MANAGEMENT FEATURES AND CAPABILITIES

Revaluation of General Ledger Accounts

Revalue General Ledger accounts denominated in a foreign currency. Adjust the value of the base currency and post the appropriate currency gain or loss transaction.

Unlimited Currencies and Rate Types

Assign different rate types to vendors and customers that use the same foreign currency. Currency Management supports an unlimited number of currencies and rate types. You can update exchange rates any time.

Configurable Decimal Precision

Configure the number of decimal places for each currency.

Automatic Handling of Rounding Differences

Automatically compute rounding differences sensitive to the decimal precision you want. Rounding differences are automatically posted to a designated General Ledger account.

Complete Tracking of Gains and Losses

Create detailed analytical reports of gains and losses. Assign accounts and subaccounts for each currency to track realized and unrealized, translation, revaluation, and rounding gains and losses.

Currency Rate Lookup

Calculations use the transaction date and the rate type for the subject transaction. Manual rate overrides will receive a warning if the entry exceeds the acceptable rate variance.

Historical and Auditing Reports

Predefined reports monitor the history of currency rates as well as translations and revaluations performed.

Audit Trail

Create a complete audit trail of all currency-related transactions. Include the ID of any user who entered a transaction or modified a record. Attach notes and supporting electronic documents directly to the transactions.

THE ACUMATICA ERP DIFFERENCE

Acumatica delivers a full suite of integrated business management applications unlike any other ERP solution on the market today.

STREAMLINE OPERATIONS

Manage your business more efficiently:

- Automate processes
- Control workflows
- Access the system from anywhere on any device—including mobile
- Promote collaboration with all-inclusive user licensing

ADAPTABLE SOLUTION

Add and extend:

- Deploy in-house or in a private or public cloud
- Easily configure your solution to fit your needs
- Add capabilities such as CRM or data visualization at any time
- Extend to other solutions and applications beyond ERP

YOUR BUSINESS ACCELERATED

Get a single version of the truth:

- Accelerate business performance and make smarter decisions with automated processes, real-time data collection, financial analyses, and forecasting
- No per user pricing – system scales as your business grows
